

Protectant Plus

Opti-Coat Protectant Plus cleans, restores and protects leather, vinyl and plastic surfaces leaving a natural satin matte finish. Opti-Coat Protectant Plus contains a balance of cleaners, penetrating oils and UV inhibitors that retain the original color of these surfaces and protect against sun damage.

Decontaminate, Clean & Protect

The Opti-Coat Maintenance Line is designed to decontaminate, clean and protect every part of your vehicle. This collection of exclusive products is the most technologically advanced car maintenance system available.

Maintenance Line

Fabric Clean & Protect

Opti-Coat Fabric Clean & Protect cleans away grease stains and spills from fabric and carpet surfaces while leaving behind a polymeric protectant to maintain your Opti-Guard™ Protection. Opti-Coat Fabric Clean & Protect contains Substantive Polymers that trap and remove dirt and grime while bonding to the fabric to protect the surface from contaminants.

Hyper™ Seal

Opti-Coat Hyper Seal is The Ultimate™ maintenance solution to help prevent bonding of contamination such as hard water deposits, bug splatter and other airborne contamination. Opti-Coat Hyper Seal creates a super slick surface for easy cleaning in high pollution environments. Use Opti-Coat Hyper Seal on wet surfaces as a drying aid after washing or apply to dry surfaces including paint, plastic moldings, rubber seals and glass.

FerreX™

Opti-Coat FerreX is designed to dissolve and remove ferrous oxides such as brake dust from wheels and industrial fallout from painted surfaces quickly by bonding and dissolving them away with minimal effort. Furthermore, Opti-Coat FerreX will dissolve and remove other surface contaminants such as tar and wax at the same time.

Opti-Glass Clean & Protect

Opti-Coat Glass Clean & Protect is designed to clean and boost your Opti-Glass™ Pro coating with a simple wipe on, wipe off application. It will clean glass surfaces without streaking while the polymers will bond to glass surfaces and continue to add protection every time you use this product. Use it by itself or in combination with your Opti-Glass™ Pro Coating for maximum hydrophobicity and durability.

No Rinse™

Opti-Coat No Rinse is the fastest, easiest and the most environmentally friendly way to wash any vehicle. Its proprietary polymers bond to the vehicle surfaces and trap dirt to clean without rinsing and leave a very slick and glossy finish that is mar-free. Properly used, you will not scratch the vehicle surface. Washing with Opti-Coat No Rinse greatly reduces the discharge of pollutants into storm drains, sewers and ground water. Opti-Coat No Rinse helps both commercial and individual users comply with the discharge guidelines established by the Clean Water Act and the Environmental Protection Agency.

MDR™

Opti-Coat MDR (Mineral Deposit Remover) is the most advanced cleaner that dissolves and removes mineral deposits and other contaminants from exterior automotive surfaces. It is a non-abrasive chemical cleaner that will dissolve and remove water based contaminants without the need to polish or abrade the surface.

M-Wash™

Opti-Coat M-Wash is designed to clean the toughest automotive grime. With regular use, the added fluoropolymers will repel airborne heavy metal pollution and maintain the coated surface free of bonded contamination. The rich foaming lather traps dirt and grime and rinses with cold water leaving a smooth, clean surface behind.

Tire Gel

Opti-Coat Tire Gel is a water-based VOC free tire dressing with high gloss and excellent durability. It can be used to protect and dress tires, wheel wells, interior and exterior plastic trim wherever a high gloss finish is desired. Opti-Coat Tire Gel also protects these surfaces from ozone, UV and oxidation.
